

Goals and Objectives

This study is being conducted to identify safety, capacity, and mobility improvements and to provide a plan for implementing those improvements based upon need, feasibility and available funding.

Improvements will be prioritized and will comply with existing transportation, land use, recreation, and master planning efforts.

Study Components

- **Public involvement process:**
 - Website
 - Open House 1
 - Open House 2
- Highway 105 operations analysis
- Highway 105 and adjacent street intersections
- Multi-modal options
- Screening process

Related projects

- Consideration of other local and regional projects

A planning horizon of 2040 will be used to address both existing and future conditions
